

ReBUILDetroit Sponsor Responsibilities and Agreement

The following groups are authorized to directly access data in the ReBUILDetroit Data Report Repository:

- Steering Committee
- Leaders and institutional representatives of the Institutional Development, Research Enrichment, and Student Training Cores
- Measurement & Evaluation (M&E) Workgroup members
- Current faculty teaching in the Research Methods and RCN/CURE curricula
- Institutional representatives from the offices of Sponsored Programs and Institutional Research
- SPEC Associates (external evaluator)

Researchers outside of these groups who would like to request access to ReBUILDetroit Data or Data Reports (the “**Data Recipient**”) will require a ReBUILDetroit Sponsor from the above list to ensure that data management is conducted according to ReBUILDetroit Policies and Procedures and that all privacy regulations are followed. A specific Sponsor can be requested at the time data access is requested or one can be assigned.

This Sponsor will have the following responsibilities:

- Review the ReBUILDetroit Data Sharing Definitions and Policies Document with the Recipient
- Provide the ReBUILDetroit Data and Data Report Use Agreement to the Data Recipient
- Submit the ReBUILDetroit Data Request Form on behalf of the Data Recipient
- Submit copies of the ReBUILDetroit Data and Data Report Use Agreement signed by all Data Recipients outside of the leadership list provided above

Note: Sponsorship does not guarantee authorship on any resulting publications or presentations. If the sponsor is interested in participating in the proposed project, then they should discuss options for collaboration with the data requestor. The ReBUILDetroit Authorship Policy should be followed to determine contributions that merit recognition as an author.
